***COPAS II: Level 2**
COGNITIVE & POTENTIAL ASSESSMENT
SUMMARIZED REPORT

ORG: INTEGRITY INTERNATIONAL
 JOB TITLE: INTERNAL SALES CONSULTANT

NAME: Louise Maniso
 ID: 810525xxxxxxx

Assessment Date: 2020-03-30

B. INTEGRATED (TOTAL) MENTAL ABILITY (IMA)

3

C. COGNITIVE CONSTRUCTS PROFILE

1. Verbal Reasoning Ability

3

2. Analytical & Logical Verbal Reasoning

2

3. Deductive Verbal Reasoning

4

4. Non-Verbal Reasoning Ability

2

5. Perceptual Reasoning

2

6. Acuity Perceptual Reasoning

2

7. Calculation & Numerical Reasoning Ability

5

D. COMPLEXITY OF WORK LEVEL (CWL) : 1 to 5

2

E. ACCURACY

4

Report Date: 2021-06-29

Please Note: - Ten Point Sten Scale is used.
 - Except in D where a 5 Level Complexity of Work scale is reported on.

*COPAS II: Level 2

COGNITIVE & POTENTIAL ASSESSMENT EXTENDED DEFINED REPORT

ORG: INTEGRITY INTERNATIONAL
JOB TITLE: INTERNAL SALES CONSULTANT

NAME: Louise Maniso

B. INTEGRATED (TOTAL) MENTAL ABILITY (IMA)

1 2 3 4 5 6 7 8 9 10

This composite scale best represents all the areas assessed by the COPAS II Level 2 test as a single weight integrated score.

C. COGNITIVE CONSTRUCTS PROFILE

C.1. Verbal Reasoning Ability

1 2 3 4 5 6 7 8 9 10

This is the ability to use verbal (language) skills well/effectively in a reasoning capacity in dealing with matters, solving problems and in making decisions. Verbal 'intelligence' includes the ability to communicate well; both orally and in writing.

C.2. Analytical & Logical Verbal Reasoning

1 2 3 4 5 6 7 8 9 10

This is the ability to identify the various elements/parts a complex situation/problem consists of and how it interacts in a critical, objective, logical (cause-effect) manner as well as generating ways and means to dealing with these issues and taking balanced and sound decisions as to which solution(s) will deal with in the situation best, in a verbal sense. This test is thus assessing the General Reasoning ability of the candidate in the verbal sphere in terms of using the analytical and logical thinking process to determine relationships in solving problems and making decisions.

C.3. Deductive Verbal Reasoning

1 2 3 4 5 6 7 8 9 10

This is the candidate's ability to use the deductive cognitive procedure, to solve problems and in making decisions – i.e., inferring/deducting from the data/situation, to his/her disposal, what the best answer or conclusion would be under the circumstances; using a verbal approach.

C.4. Non-Verbal Reasoning Ability

1 2 3 4 5 6 7 8 9 10

This is the ability of the candidate to reason objectively in an analytical, logical and perceptual way in solving problems and making decisions in settings where words and numbers do not feature. This is achieved by using visual symbols and figures where the candidate has to see the relationships between these symbols and figures to identify an appropriate missing figure or to complete a series.

C.5. Perceptual Reasoning

1 2 3 4 5 6 7 8 9 10

This is the ability of the candidate to understand and learn from his/her experience by being able to see relationships between aspects of a situation and what may happen to them; if this occurs, then that will be the result. The quicker a person is able to see patterns in the information he received and make the links between the element (or units of information), the better he/she is placed to learn from the situation and take the necessary action, i.e., making the (correct) decision – and by implication, the more intelligent he/she is.

C.6. Acuity Perceptual Reasoning

1 2 3 4 5 6 7 8 9 10

This is the ability to be sensitive and sharp to detail and in spotting small variations, deviations and/or concepts, constructs and/or problems consisting of a wide variety of variables and not to allow for obvious oversights-or make unnecessary mistakes.

C.7. Calculation and Numerical Reasoning Ability

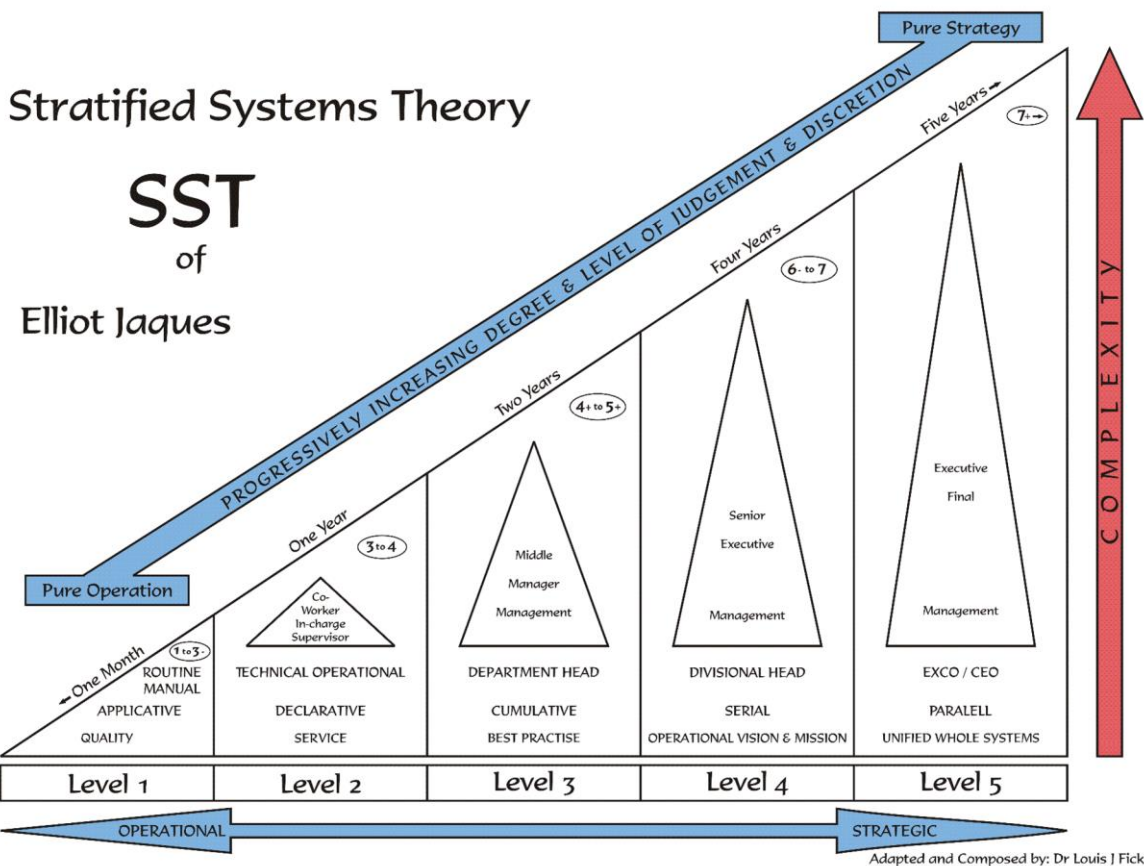

1 2 3 4 5 6 7 8 9 10

This is the ability to be speedy and accurate in identifying a numeric base to a situation/problem, e.g., series and sequence formations and to effectively deal therewith in performing arithmetic computations such as adding, subtracting, multiplying, dividing and/or a combination thereof in providing solutions to the situation/problem.

D. COMPLEXITY OF WORK LEVEL (CWL 1-5)

1 2 3 4 5

This is indicative of the Complexity Work Level (CWL) the candidate is presently able to handle well in terms of the person’s Integrated Mental Ability (IMA) to deal with the typical situations and functions comprising that particular organisational level – progressing from a virtually pure operations level of routine manual functions to the virtual pure strategic functions typified by the executive level in the organisational echelon as reflected in the schematic presentation of the 5-Level Stratified Systems Theory of Elliot Jaques – i.e., the progressively increasing Complexity of Work Levels (CWL), shown below:

E. ACCURACY

1 2 3 4 5 6 7 8 9 10

Although not a cognitive property per sé, this scale is indicative of the candidate’s behavioural disposition regarding the degree of accuracy with which he/she typically applies his/her cognitive capacity in dealing with situations or solving problems in practice. The higher the score on this scale, the more careful he/she tends to be in applying his/her mental ability accurately in solving problems and making decisions in general terms.
